My personal site: [sinaghiasi.ir](https://sinaghiasi.ir)

Completed mandatory military service

## Professional Summary

Front-End Developer with 3 years of experience, including 2 years in WordPress development and 1 year in React.js and Next.js-based front-end development. Skilled in building responsive, user-friendly, and performance-oriented web applications, with a strong focus on clean code, usability, and collaboration within development teams.

## WORK EXPERIENCE

### Cafe Seo

Wordpress Developer

Tehran, Iran

2021 - 2023

- WordPress Developer at Cafe SEO with expertise in end-to-end development and optimization of high-performance, responsive websites. Transformed design concepts into dynamic applications by building custom themes, bespoke plugins, and integrating complex features. Leveraged WordPress API for advanced backend customizations, including product management panels, consistently delivering polished, scalable, and business-driven solutions.

### Diam Tech

Front-End Developer

Tehran, Iran

2025 - 2026

- Front-End Developer at Diam Tech, specializing in React and Next.js. Developed their primary company website and an integrated customer-facing control panel for IoT devices. Engineered real-time control capabilities using WebSockets, ensuring seamless online interaction with managed devices. Leveraged Shadcn UI for a modern, consistent user experience on their main digital platform.

## PORTFOLIO

### Course Online Shop

- Developed a responsive front-end for an online course marketplace using React.js, delivering a high-performance, user-friendly web application. Crafted a dynamic UI with reusable components and modern JavaScript, including an admin panel for course and user management. Integrated with self-developed backend APIs to support real-time course browsing, cart functionality, and a dual-theme interface (dark and light mode) for enhanced user experience and accessibility. This project showcases expertise in React.js, full-stack development, and scalable, intuitive web solutions.

**Technologies used:** React, Tailwind-css, Express.js, MongoDB, JWT

**GitHub:** [Backend](#) | [Frontend](#)

### Next.js Blog

- Developed a dynamic blog frontend using Next.js, TypeScript, and Tailwind CSS, integrated with a custom API. Implemented secure user authentication, efficient post search, bookmarking, and liking features, leveraging Next.js's SSG for optimal performance and SEO. Built a responsive, type-safe UI with a modular codebase. Demonstrated expertise in modern frontend development and API-driven applications.

**Technologies used:** React, Tailwind-css, Express, MongoDB

**GitHub**

## Three.js Catapult Game

- Developed a 3D web-based game using Three.js, leveraging JavaScript and WebGL to create an interactive catapult-themed experience. Designed core mechanics, including dynamic physics, user controls, and real-time rendering of 3D models, with smooth animations, realistic lighting, and camera systems. Implemented a modular code structure to ensure maintainability and optimized performance for seamless browser-based gameplay across devices. This project highlights skills in 3D graphics programming, game development, and front-end engineering, delivering a polished and engaging user experience.

**Technologies used:** HTML, CSS, Javascript, Vite, Three.js, Cannon-es

[GitHub](#) | [Live demo](#)

## Booking Hotel Frontend

- Developed a responsive hotel booking web application using Vite, React and CSS Modules for modular styling. Leveraged React Context API for efficient state management and react-router-dom for seamless navigation. Integrated axios with a JSON server for mock data, enabling rapid development and testing. Optimized with Vite for high performance, demonstrating skills in building scalable, user-centric frontends with clean, maintainable code.

**Technologies used:** Vite, React, React Router Dom, CSS modules, Axios

[GitHub](#) | [Live demo](#)

## Responsive Personal Portfolio Website

- Developed a responsive personal portfolio website using HTML, CSS, and vanilla JavaScript to showcase projects, skills, and professional experience. Designed with Flexbox, media queries, and engaging animations to ensure mobile-friendly adaptability and intuitive navigation. While not my current portfolio website, this project highlights my proficiency in front-end development, responsive design, and clean UI architecture.

**Technologies used:** HTML, CSS, Javascript
